

NKI Breast Cancer Dataset 1

Source: <https://data.world/deviramanan2016/nki-breast-cancer-data>

-Sample Size: 272

-Attributes: 252

-196:76 of 0:1

-Information: This dataset contains information on the symptoms and flares present in different breast cancer patients. The binary dependent variable is represented by eventual death of the patient within the extended course of this study.

Peptide and Cancer Dataset 2

Source:

https://figshare.com/articles/_N_Terminal_Pro_Brain_Natriuretic_Peptide_Is_Associated_with_a_Future_Diagnosis_of_Cancer_in_Patients_with_Coronary_Artery_Disease_/1438913

-Sample Size: 699

-Attributes: 58

-676:23 of 0:1

-Information: This dataset includes information on the association between a variety of factors including elevated plasma levels of natriuretic peptides in cancer patients with the eventual death of these patients, the binary dependent variable.

For Test Size 0.5 Rescaled (Only .5 and .3 Train Sizes)

Mean Accuracy and Area Under the Curve:

Precision and Recall:

For Test Size 0.6 Rescaled (error with logistic regression--- keeps plotting same y values as before, and reports error with dataset, even though it works for ER)

Antiseptic for Amputation Dataset 3

Source: <http://users.stat.ufl.edu/~winner/data/lister.dat>

-Sample Size: 75

-Attributes: 4

-22:53 of 0:1

-Max ACC: ER: 0.75454545; LR: 0.73045455

-Max AUC: ER: 0.78181818; LR: 0.7463306

-Max Prec: ER: 0.74300699; LR: 0.71563223

-Max Recall: ER: 0.78181818; LR: 0.79

-Information: This data contains information on different amputees, and the binary dependent variable represents if antiseptic was able to successfully act as a treatment or not.

Mean Accuracy and Area Under the Curve:

Precision and Recall:

For Test Size 0.6 Rescaled (error with logistic regression---keeps plotting same y values as before, and reports error with dataset, even though it works for ER)

Wisconsin Breast Cancer Dataset 4

Source: <https://data.world/health/breast-cancer-wisconsin/workspace/project-summary?agentid=health&datasetid=breast-cancer-wisconsin>

-Sample Size: 569

-Attributes: 30

-357:212 of 0:1

-Information: This dataset provides information on a variety of details of lab work done on patients with breast tumors, and then classifies them as either benign or malignant. In adjusting the dataset to work with the code, benign tumors were set as 0 and malignant as 1.

LMW PAHs and Pulmonary Health Dataset 6

Source: <https://www.ncbi.nlm.nih.gov/geo/query/acc.cgi?acc=GSE84649>

-Sample Size: 341 -Attributes: 17 -290:51 of 0:1

-Information: This dataset includes information on low molecular weight polycyclic aromatic hydrocarbons and their effect on pulmonary health. Factors include secondhand smoke, environmental tobacco smoke, activation of mitogen activated protein kinases, with a binary variable measuring treatment response.

Mean Accuracy and Area Under the Curve:

Paradoxical Reactions in Buruli Ulcer Dataset 7

Source:

https://plos.figshare.com/articles/Genetic_Susceptibility_and_Predictors_of_Paradoxical_Reactions_in_Buruli_Ulcer/3946641

-Sample Size: 241 -Attributes: 36 -178:63 of 0:1

-Information: This dataset includes information on the predictors of paradoxical reactions which have been hypothesized to be significant in being associated with buruli ulcers. The binary dependent variable is the presence of paradoxical reactions.

School: Adolescent Health Dataset 8

Source: <http://www.thearda.com/Archive/Files/Descriptions/ADDHW3ED.asp>

-Sample Size: 3947 -Attributes: 79 -68:3879 of 0:1

-Information: This dataset contains information on an NIH study of adolescent to adult health understanding the relationship between respondents' social, economic, psychological, amongst other factors and their relationship with social environments and later on achievement outcomes in adulthood. The binary independent variable is Year 1 course level.

Mean Accuracy and Area Under the Curve:

HIV Stigma Dataset 9

Source: <https://dataverse.harvard.edu/dataset.xhtml?persistentId=doi:10.7910/DVN/DX7MWY>

-Sample Size: 10665 -Attributes: 37 -1774:8891 of 0:1

-Information: This dataset includes information on the application of an HIV related stigma scale to undergraduates in mainland china with the binary variable focused on being willingness to engage in treatment even in the context of an environment with stigma, though based on the details of the study, it seems to be independent with the relationship with other variables being associative.

Mental Health Dataset 15

Source:

https://figshare.com/articles/PHQ_9_GAD_7_and_Epworth_Sleepiness_Scale_Scores_of_783_Mexican_Medical_Students/1305817

-Sample Size: 776 -Attributes: 35 -67:709 of 0:1

-Information: This dataset includes information on the association between prior psychiatric associations and diagnostic measures and the binary variable of a depression diagnosis in medical students in Mexico. While the dataset didn't specify if this was a dependent variable, it clearly has a strong associative relationship with other factors in the study,
